

Press Release

VARTA Microbattery at the Metering Billing / CRM Europe in Amsterdam

Ellwangen, 16. September 2011

VARTA Microbattery presents the latest energy solutions at the Metering Billing/CRM Europe in the Rai Convention Centre in Amsterdam from 4 to 6 October 2011

At the worldwide leading event for metering, VARTA Microbattery will present its energy solutions for gas, water, heat and electricity meters as well as for heat cost allocators and communication modules. The leading battery manufacturer provides a comprehensive range of batteries for smart metering systems with appropriate "design in support". With its programme, VARTA offers the complete service, as well as a full range of primary lithium button cells and cylindrical cells. VARTA Microbattery's development engineers provide support for the ideal battery selection and battery-design-in for each application type. Of course, the technology leader serves all customers with formulation of specifications and the calculation of life time.

Li-MnO₂ and Li-SOCl₂ Batteries

By choosing these electrochemical systems you benefit from low self-discharge, wide temperature range (between -55 to +85°C) and superior shelf life and operational life up to 15 years and more. Key features are also a broad capacity range (from 230 to 19000 mAh), advanced laser sealing technology, high energy density and resistance to corrosive environments.

All in all, safety from our products is the first design priority and all cells are marked with UL recognition.

Superior capacity and reliability are the requirements for modern communication and metering systems and thus of the supply of energy. Therefore, supply your application with energy from a market leader.

Come with VARTA into a smart future – we provide innovative batteries for metering applications.

Our experts would be pleased to advise you locally.

VARTA Microbattery GmbH

VARTA Microbattery is one of the major battery manufacturers in the world maintaining production facilities globally in order to supply more than 100 countries with quality products. The headquarters of the company is in Germany, Ellwangen. We develop and produce batteries comprising of many electrochemical systems and cell geometries. As a global system supplier we provide the best solution possible to satisfy our customers' application requirements.
